

Annatlas Son

Four teenage boys go for a hike in the woods at the edge of their Missouri town and stumble through a gate into the world of Annatla--where magic is commonplace, and suburbs and lawnmowers unknown. Before they can return home, an evil being known as the Black Jester passes through the gate, destroying it, and their unexpected fun turns serious. With the help of an obstinate girl and kindly hermit, they must journey across vast lands and the sea to the last remaining gate back home--before the Black Jester destroys it and rewrites the Laws of Magic. When one of the boys is tempted by the lure of power, he becomes an enemy himself, and the remaining three are left to decide whether to rescue their companion or journey home without him. The main character learns he is a native of Annatla, and that he is destined to lead its people from destruction. 468 pages
