

Atlas of Staging in Gynecological Cancer

Atlas of Staging in Gynecological Cancer is designed to be used in conjunction with diagnostic procedures between the surgeon and the radiologist. It describes the two common staging regimes used by all units across the world, namely, the FIGO staging system and the TNM system. The landscape format allows each chapter to open on the left hand side and read across the double spread, enabling the reader to see both staging systems at once. Each chapter has a separate section on Epidemiology, Diagnosis, with radiological plates, Management, in tabular form, and Key Points.
