

No Pro Needed Volume 2: Diving Into It

Your house is falling apart and you're off to... Disneyland?? If your sink is backing up and the holes in your walls seem to be getting bigger... NOW is NOT the time to go! Remember when you moved into your new home? Everything was working the way it's supposed to and looked fabulous! But time has a way to take its toll out on everything. Wouldn't it be great to get it back into shape? How about better than before? Why wait until things get so bad you don't even want to look at them? You know they aren't going to fix themselves! And you could pay someone to come in and (hopefully) fix it all up, but then you would NEVER get to Disneyland - but you'd be helping others to get there! If only you knew how to do all of these things yourself you could save a lot of money and make your travel and vacation dreams arrive sooner. And just maybe you could do it yourself if you just had enough information to even get started, let alone finish! Well, here it is - the help you've been looking for is here now! Go back to the cover of this book and take a look inside. Do you have some issues with drains, or even garbage disposals? You can fix it! Ever tried to fix a pocket door? You can now! Can you paint a straight line without help? Learn how now! And how about that ceiling fan you wanted in the spare bedroom? Do it! I'll even tell you when you should have an assistant! Those helping hands really do HELP! Step-by-step plans to get the job done right the first time! No need to waste your time with trial and error practices. I've already spent over 40 years doing that so you don't have to. And it's your money that you part with. If you are like me you don't have disposable income to just throw away. Make the most of it and do these things yourself. You can't imagine how great it feels to finish some of these projects and be able to stand back and say I DID THAT! But you will! Then... Disneyland! The

choice is yours - any project in this book will save you a small fortune! The projects I present in this book can seem daunting at times. But there is a light at the end of the tunnel and its not the train! This volume has the more difficult tasks but only because they will require a bit more time to complete. Just remember that it is a step-by-step layout and dont try to bite the whole job at once! And none of the steps is that hard to do. Some of them may require a helping hand and youll see why when you get to them. Even so, you can get ready to be successful at fixing up your home and keeping it running smoothly! You should have ALREADY clicked on the Buy Now button!

2) Anguilla, St Maarten/Martin, St. Barts, Saba, Statia, St Kitts & Nevis, Antigua, The Complete Diving Guides to scuba diving in the Eastern Caribbean, All in all, the guide contains everything a diver needs to know to decide .
