

Visions of Space: Artists Journey Through the Cosmos

A documentation of the development of Space Art from the 19th century to the present day. Included in this volume are space probes, shuttles, lunar bases, colonies on Mars, exotic alien landscapes, Black Holes, galaxies and nebulae.

Lucien Rudauxs 19th-century vision of the Moon remains accurate because it sticks to geology rather than wishful thinking. In Visions of Space: Visions of Space: Artists Journey Through the Cosmos. Front Cover. David A. Hardy. Limpsfield, 1989 - Art, Modern - 176 pages. - 4 min Wanderers is a vision of humanitys expansion into the Solar System, based on scientific VISIONS OF SPACE: ARTISTS JOURNEY THROUGH THE COSMOS by DAVID A HARDY and a great selection of similar Used, New and Collectible Books - 3 min - Uploaded by Great Big Story (take a moment to let that combination sink in) takes us on a journey into his magical
